## C-Splash 2

Submersible LED spotlight with intelligent color light

C-Splash 2 is an ultra-thin, submersible fixture designed to provide vibrant color and color-changing light in water to a depth of 15 ft (4.6 m). With its watertight cast brass housing and silicon bronze adjusting hardware, C-Splash 2 is perfect for water-based applications such as fountains and theme park installations, as well as for applications situated in harsh environments.

- **Rugged and watertight** — Cast brass housing and yoke with silicon bronze adjusting hardware is designed for submersion in water to a depth of 15 ft (4.6 m). This IP68-rated fixture is also able to withstand water treated with bromine or chlorine.
- **Two beam angles** — The frosted tempered glass lens offers a soft-edge beam of light at 22°, while the clear glass lens offers extended light projection at 10°.
- **Unified power and data cable** — Each C-Splash 2 fixture comes with a 60 ft (18.3 m) unified power and data cable to minimize wiring. C-Splash 2 is intended for use with PDS-150e and PDS-60 24V power / data supplies.
- **Industry-leading controls** — C-Splash 2 works seamlessly with the complete line of Philips controllers, including iPlayer 3, Light System Manager, and ColorDial Pro, as well as third-party controllers.
- **Versatile light positioning** — Locking base and pivot allows vertical and horizontal rotation through a full 360°.
- **Temperature monitoring** — C-Splash 2 has a temperature monitoring feature that automatically interrupts operation to protect the fixtures from damage due to extreme operating temperatures.
- **High output, underwater** — This submersible fixture offers the full range 16.7 million RGB colors and an output of over 500 lumens. Long-life LEDs significantly reduce or eliminate required maintenance, a major advantage for underwater installations.

\* Lumen measurement complies with IES LM-79-08.

† L70 = 70% lumen maintenance (when light output drops below 70% of initial output). L50 = 50% lumen maintenance (when light output drops below 50% of initial output). Ambient luminaire temperatures specified. Lumen maintenance calculations are based on lifetime prediction graphs supplied by LED source manufacturers. Calculations for white-light LED fixtures are based on measurements that comply with IES LM-80-08 testing procedures.
