

## ZAPI 1.5

Color Kinetics® Zapi 1.5 is a hand-held address programmer that provides a convenient way to assign DMX base addresses to all Color Kinetics lights, and stand-alone effects to C-Splash. Zapi 1.5 features serial addressing that lets you easily address fixtures with factory set serial numbers. Zapi's user-friendly LCD display and simple, intuitive interface make it much easier to use than DIP switches, particularly for long runs of lights.

Zapi 1.5 connects to Color Kinetics lights, either directly or through a Color Kinetics power/data supply. Just connect Zapi to your iColor® Fresco, iColor Cove, iColor MR, or C-Splash fixture, and program the light with the address or effect you choose, all without setting a single DIP switch.

Zapi 1.5 is contained in an ergonomic, black plastic housing, and comes with a 24VDC wall transformer, an RJ45 data cable, and an iColor Cove cable.

### ZAPI COMPATIBILITY

Zapi 1.5 can program DMX base addresses for all current Color Kinetics fixtures, and can program stand-alone effects for C-Splash only.

Fixtures	ZAPI 1.5 MODES			
	Serial Number	All Same DMX	Standalone	Fresco
iColor Accent	✓	✓		
iColor Cove		✓		
iColor Fresco		✓		✓
iColor MR		✓
